

November 25, 2010

Ontario Energy Board P.O. Box 2319 27th Floor, 2300 Yonge Street Toronto, Ontario M4P 1E4 Attention: Kirsten Walli, Board Secretary

Dear Ms. Walli:

RE: TILLSONBURG HYDRO INC. 2011 Electricity Distribution Rate Application EB-2010-0116

Tillsonburg Hydro Inc. ("THI") is among the group of LDC's that were scheduled to file its 2011 Incentive Regulation Mechanism (IRM) application for 2011 Electricity Distribution Rates by November 12, 2010.

Due to problems encountered with the models provided by Ontario Energy Board staff, THI requested a delay of 3 business days subsequent to return of functioning models in its letter dated November 11, 2011. The additional time was required to ensure that no further problems remained. THI received the final model correction from Board staff on November 22, 2010. With the 3 business days subsequent requested, the revised filing date would be November 25, 2010.

Please find attached Tillsonburg Hydro Inc.'s ("THI") 2011 IRM3 Rate Application. This application was filed by way of the OEB's RESS e-filing services.

Also enclosed are:

- 1. Two paper copies of the Application,
- A CD containing a pdf version of the Application, as well as the Excel versions of the 2011 IRM3 Rate Generator, 2011 IRM Deferral and Variance Account Workform, 2011 IRM3 Shared Tax Savings Workform, 2011 IRM3 Revenue Cost Ratio Adjustment Workform, 2011 RTSR Adjustment Workform, and 2011 Bill Impact Summary.

Should you have any questions or require further information, please do not hesitate to contact me.

Yours truly,

W. John Gott, CA Finance Regulatory Affairs Manager

CORPORATE OFFICE 200 Broadway, Tillsonburg, Ontario, N4G 5A7, Telephone # (519) 842-6428, Fax # (519) 842-9431 Web: www.tillsonburg.ca

Tillsonburg Hydro Inc. EB-2010-0116 2011 Electricity Distribution Rate Application Manager's Summary Filed: November 25, 2010 Page 1 of 7

MANAGER'S SUMMARY

Tillsonburg Hydro Inc. ("THI") is a licensed electricity distributor (ED-2003-026) that owns and operates an electricity distribution system that provides service to the Town of Tillsonburg. THI charges its customers distribution rates and other charges as authorized by the Ontario Energy Board (the "Board"). In this application, THI is applying for rates and other charges effective May 1, 2011.

As part of its regulation of electricity distributors, the Board established a multi-year rate electricity distribution rate setting plan which indicated that, commencing with 2008 rates, a limited number of distributors would be identified each year to file a future test year cost of service application based on Chapter 2 of the Board's Filing Requirements, re-issued May 27, 2009. The plan would run for four years enabling each rate regulated distributor in the province to rebase its rates at least once during the four year plan.

For any of the other distributors seeking approval to change their distribution rates, distributors would file a mechanistic, formulaic update to their current rates based on the Board's incentive regulation mechanism ("IRM"). The incentive mechanism for rates after a rebasing during the period 2008 to 2011 is called the 3rd Generation incentive rate regulation mechanism ("IRM3").

THI filed a cost of service application for the 2009 rate year, and is required to file its 2011 Rate Application using IRM3.

THI's proposed Tariff of Rate and Charges Schedule, effective May 1, 2011, is Exhibit A. The associated bill impacts of these revised rates are presented in Exhibit B. THI notes that neither the Rate Rider for Global Adjustment Sub-Account Disposition (2010) – effective until April 30, 2011, nor the proposed Rate Rider for Global Adjustment Sub-Account Disposition (2011) – effective until April 30, 2012 are reflected in the model's determination of bill impacts. When THI brought this issue to the attention of Board staff, THI was told that this was a glitch in the model that they were aware of and could not fix. Also, THI's requested recovery of Late Payment Penalty Litigation Costs is not yet reflected.

THI prepared the application using the Board's "2011 IRM3 Rate Generator" [Exhibit C], "2011 IRM3 Revenue Cost Ratio Adjustment Workform" [Exhibit D], "2011 IRM Deferral and Variance Account Workform") [Exhibit E], "2011 IRM3 Shared Tax Savings Workform") [Exhibit F], and the "2011 RTSR Adjustment Workform" [Exhibit G].

THI's current Tariff of Rate and Charges Schedule, effective May 1, 2010, is found at Exhibit H.

Revenue Cost Ratio Adjustment

In the Board's decision, dated July 10, 2009, THI was directed that the ratios for 2009 rates shall be those that approach the minimum or maximum of the Board target range by 50% of the difference, and that the remaining 50% difference be incorporated in THI's rates in equal increments over the next two years.

The 2010 application made the second adjustment, and the current application reflects the third and final adjustment, with the following exceptions:

- The General Service < 50 kW class is already at the maximum target of 120%, and was left unchanged.
- The Unmetered Scattered Load class is already at the minimum target of 80%, and was left unchanged.
- The Residential class was selected as the balancing group which results in a reduction of the ratio to 108% from the current 117%.

Price Cap Adjustment

THI has used the Board's default values for the Price Escalator (GDP-IPI), Productivity Factor and Stretch Factor of 1.30%, -0.72%, and -0.40% respectively. Use of the Board's proxy values result in a Price Cap Index of 0.18%. THI understands that the Board will adjust the Price Escalator in determining the final 2011 rates.

Smart Meter Funding Adder

In the Decision and Order (EB-2009-0251) dated April 8, 2010, the Board approved a smart meter funding adder for THI of \$2.17 per month per metered customer. THI proposes to continue the \$2.17 smart meter funding adder for the 2011 rate year and expects to bring forward a smart meter cost recovery application as part of its next cost of service application.

Deferral and Variance Account Rate Riders

On July 31, 2009 the Board issued its Report on Electricity Distributors' Deferral and Variance Account Review Initiative (EDDVAR). The Board Report sets out the Board's policy framework for the review and disposition of deferral and variance accounts for electricity distributors. As part of this framework the Board has decided to review certain deferral and variance accounts along with a distributors' IRM application. These accounts were classified as Group 1 accounts and include accounts – 1550, 1580, 1584, 1586, 1588, 1590 and 1595. The Board also decided to apply a preset disposition threshold of \$0.001/KWh. When this threshold is exceeded, a distributor is required to file a proposal for the disposition of all Group 1 Account balances (including carrying charges). The onus will be on the distributor to justify why any account balance should not be cleared.

THI's Rate Rider for Deferral/Variance Account Disposition (2009) – effective until April 30, 2011, cleared variances in the noted Group 1 and other variance accounts for the period January 2005 to December 2007.

THI's Rate Rider for Deferral/Variance Account Disposition (2010) – effective until April 30, 2011, and the Rate Rider for Global Adjustment Sub-Account Disposition (2010) – effective until April 30, 2011, cleared variances in the noted Group 1 accounts for the period January 2008 to December 2008.

Group 1 accounts for the period January 2009 to December 2009 (including carrying charges) total a net debit of \$412,841. Given 2009 Billed kWh of 184,886,805, the resulting claim of 0.02233 per kWh meets the Threshold Test for disposition. Following the methodology of the "2011 IRM Deferral and Variance Account Workform" [Exhibit E], Group 1 Account balances, excluding RSVA – Power, Global Adjustment, a credit of \$218,839, is returned to all customers. And the RSVA – Power, Global Adjustment debit of \$631,680, is charged only to Non-RPP customers. THI has proposed a Rate Rider for Deferral/Variance Account Disposition (2011) – effective until April 30, 2012, and a Rate Rider for Global Adjustment Sub-Account Disposition (2011) – effective until April 30, 2012.

Lost Revenue Adjustment Mechanism (LRAM) and Recovery/Shared Savings Mechanism (SSM) Recovery Rate Rider

THI is not applying for a LRAM/SSM Recovery Rate Rider at this time.

Foregone Revenue Rate Rider

The current application assumes that the 2011 rates proposed will be approved effective May 1, 2011 and therefore has not applied for a Foregone Revenue Rate Rider.

Tax Change Rate Rider

Following the methodology of the "2011 IRM3 Shared Tax Savings Workform" [Exhibit F], THI's tax sharing amount is a refund of \$2,229. This amount when unitized using THI's volumetric billing determinants, results in (\$0.0000) energy-based kWh rate riders when rounded to four decimal places, and demand-based kW rate riders from (\$0.0018) to (\$0.0132). Use of these rates as determined by the model would only return \$496 of the required \$2,229.

In Section 1.2.3 of Chapter 3 of the Filing Requirements for Transmission and Distribution Applications, dated July 9, 2010, the Board has determined in the event where the calculation of one or more rate classes' rate adder or rate rider results in energy-based kWh rate riders of (\$0.0000) when rounded to the fourth decimal place and demand-based kW rate riders of \$(0.00) when rounded to the second decimal place, the entire Board-approved amount for recovery or refund shall be recorded in a USoA account to be determined by the Board for disposition in a future rate setting. As such, THI proposes to place the full \$2,229 in variance account 1595 for future disposition, as was done in the 2010 rate application (EB-2009-0251) with that year's tax refund sharing amount of \$1,121.

Incremental Capital Rate Rider

THI confirms that it does not anticipate any unplanned incremental capital and is not applying for an Incremental Capital Rate Rider.

Low Voltage Volumetric Rate

THI is not applying for a Low Voltage Volumetric Rate.

Retail Transmission Service Rates

On July 8, 2010 the Board issued revision 2.0 of the Guideline G-2008-0001 Electricity Distribution Retail Transmission Service Rates (the "Guideline"). This Guideline outlines the information that the Board requires electricity distributors to file when proposing adjustments to their retail transmission service rates ("RTSRs") for 2011. THI followed the methodology of the Board's "2011 RTSR Adjustment Workform" [Exhibit G] and the proposed 2011 RTSRs reflect the outcome of the Board's model.

MicroFIT Generator

THI is applying for the continuation of the monthly service charge of \$5.25 as approved by the Board.

Loss Factors

THI is not applying for a change in the approved Loss Factor and has entered the rates as they appear in the current tariff sheet.

Bill Impacts

The bill impact for a residential customer using 800 kWh per month is a delivery cost decrease of \$1.11 or 4.4%, and a total decrease of \$1.44, or 1.2%.

The bill impact for a general service <50 kW customer using 2,000 kWh per month is a delivery cost increase of \$2.84 or 5.5%, and a total increase of \$2.73, or 1.0%.

THI notes that the 2011 Rate Model assumes the Streetlight customer class is on a per connection basis, whereas THI's approved service charge is on a per customer basis. THI requested that Board staff correct the model. Board staff acknowledged that the bill impact result was inaccurate, but that the correction would not be made since all LDC's must use the connection method. As a result, the model's bill impact default of 37 kWh, or 0.10 kW per connection results in the incorrect presentment a delivery increase of \$158.03 per month, or 10.2%, and a total increase of \$178.56, or 10.2%, which exceeds the 10% threshold. The main cause of the large increase is due to the application of the final Revenue Cost Ratio Adjustment.

Tillsonburg Hydro Inc. EB-2010-0116 2011 Electricity Distribution Rate Application Manager's Summary Filed: November 25, 2010 Page 6 of 7

Also, THI notes that neither the Rate Rider for Global Adjustment Sub-Account Disposition (2010) – effective until April 30, 2011, nor the proposed Rate Rider for Global Adjustment Sub-Account Disposition (2011) – effective until April 30, 2012 are reflected in the bill impact model. When THI brought this issue to the attention of Board staff, THI was told that this was a glitch in the model that they were aware of and could not fix.

Current and Applied for Allowances

THI is applying for a continuation of the existing Transformer Allowance for Ownership and Primary Metering Allowance for transformer losses of (\$0.60) and (1.00%) respectively.

Current and Applied for Specific Service Charges

THI is applying for a continuation of the existing Specific Service Charges.

Current and Applied for Retail Service Charges

THI is applying for a continuation of the existing Retail Service Charges.

Rate Rider or Z-factor Treatment for Recovery of Late Payment Penalty Litigation Costs

- 1. As part of this application, THI will be seeking recovery of a one-time expense in the amount of \$30,082.65 which is to be paid on June 30, 2011. This payment will serve to resolve long-standing litigation against all former municipal electric utilities ("MEUs") in the Province in relation to late payment penalty ("LPP") charges collected pursuant to, first, Ontario Hydro rate schedules and, after industry restructuring, Ontario Energy Board rate orders (the "LPP Class Action").
- 2. On July 22, 2010, The Honourable Mr. Justice Cumming of the Ontario Superior Court of Justice approved a settlement of the LPP Class Action, the principal terms of which are the following:
 - (a) Former MEUs collectively pay \$17 million in damages;
 - (b) Payment is not due until June 30, 2011; and
 - (c) Amounts paid, after deduction for class counsel fee, will be paid to the Winter Warmth Fund or similar charities.
- 3. THI will make a payment of \$30,082.65 by June 30, 2011. This amount represents THI's share of the settlement, applicable taxes and legal fees. THI believes that the settlement is in its best interest and the best interest of its customers and that the payment in connection with the settlement will be a prudent one.
- 4. All electricity distributors filing for cost of service and IRM applications for 2011 electricity distribution rates (the "LDCs") proposed that the Board hold a generic hearing to determine if all costs and damages incurred in this litigation and settlement are recoverable from customers and, if so, the form and timing of recovery from customers. The Board has now commenced proceeding EB-2010-0295 on its own motion to determine whether Affected Electricity Distributors should be allowed to recover from ratepayers the costs and damages incurred as a result, and if so, the form and timing of such recovery. LDCs will be collectively filing written evidence to address the prudence of the settlement, the costs incurred, the methodology of allocating total settlement costs amongst the LDCs, the proposed method of recovery, and any other matters the Board determines appropriate.

Tillsonburg Hydro Inc. EB-2010-0116 2011 Electricity Distribution Rate Application Exhibit C Filed: November 25, 2010

EXHIBIT C

2011 IRM3 Rate Generator

Name of LDC: File Number: Effective Date: Version : 2.0

Tillsonburg Hydro Inc. EB-2010-0116 Sunday, May 01, 2011

LDC Information

Applicant Name	Tillsonburg Hydro Inc.
Application Type	IRM3
OEB Application Number	EB-2010-0116
Tariff Effective Date	May 1, 2011
LDC Licence Number	ED-2003-0026
Notice Publication Language	English
DRC Rate	0.00700
Customer Bills	12 per year
Distribution Demand Bill Determinant	kW
Stretch Factor Group	II
Stretch Factor Value	0.4%
Last COS Re-based Year	2009
Last COS OEB Application Number	EB-2008-0246
Special Purpose Charge - Current	Yes
Special Purpose Charge - Applied	Yes
Application Contact Information	
Name:	W. John Gott
Title:	Finance Regulatory Affairs Manager
Phone Number:	519-842-6428 ext 3229
E-Mail Address:	jgott@tillsonburg.ca

Decision - Cost Revenue Adjustments by Rate Class

The purpose of this sheet is to input the Revenue Cost Ratios as determined from column G on Sheet "C1.5 Proposed R C Ratio Adj" of the applicants 2010 IRM3 Supplemental Filing Module or 2010 COS Decision and Order.

Under Direction the applicant can choose "No Change" - no change in that rate class ratio, "Change" - Board ordered change from COS decision, or Rebalance to apply offset adjustments to Decision prescribed rate classes.

Rate Class	Direction	Current Year	Year 1	Transition Year 2	Year 3	Year 4	Year 5
		2010	2011	2012	2013	2014	2015
Residential	Rebalance	117.00%	tbd	tbd	tbd	tbd	tbd
General Service Less Than 50 kW	No Change	120.00%	120.00%	120.00%	120.00%	120.00%	120.00%
General Service 50 to 499 kW	Change	75.00%	80.00%	80.00%	80.00%	80.00%	80.00%
General Service 500 to 1,499 kW	Change	71.00%	80.00%	80.00%	80.00%	80.00%	80.00%
General Service Equal To Or Greater	Change	62.00%	80.00%	80.00%	80.00%	80.00%	80.00%
Unmetered Scattered Load	No Change	80.00%	80.00%	80.00%	80.00%	80.00%	80.00%
Sentinel Lighting	Change	129.00%	120.00%	120.00%	120.00%	120.00%	120.00%
Street Lighting	Change	64.00%	70.00%	70.00%	70.00%	70.00%	70.00%

RSVA - Power (Excluding Global Adjustment)	1588	0	60,884					60,884	0	53,744		53,744
RSVA - Power (Global Adjustment Sub-account)	1588	0	674,152					674,152	0	(49,308)		(49,308)
Recovery of Regulatory Asset Balances	1590	0						0	0			0
		0					0	0	0		0	0
Residual Balance Disposition and recovery of Def/Var Balances Account (2008)	1595	0					0	0	0		0	0
Total		0	411,064	0	0	0	0	411,064	0	(2,391)	0	(2,391)

¹ For RSVA accounts only, report the net additions to the account during the year. For all other accounts, record the additions and reductions separately.

² Provide supporting evidence i.e. Board Decision, CRO Order, etc.

³ Provide supporting statement indicating nature of this adjustments and periods they relate to

⁴ This records the values of amounts removed from Group One accounts in previous proceedings; but does not enter offsets for disposition of 1590, as recovery has not been completed.

Forecast Wholesale Transmission

The purpose of this sheet is to calculate the expected billing when forecasted 2011 UTR rates are applied against historical (2009) transmission units.

Tillsonburg Hydro Inc. EB-2010-0116 2011 Electricity Distribution Rate Application Exhibit H Filed: November 25, 2010

EXHIBIT H

2010 Tariff of Rates and Charges Schedule

Effective and Implementation Date May 1, 2010 except for the microFIT Generator Class effective date of September 21, 2009

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2009-0251

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account in one of three categories of residential services: single-family or single-unit homes, multi-family buildings, and subdivision developments. Further servicing details are available in Tillsonburg Hydro's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy and Infrastructure Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.

EB-2009-0251

microFIT GENERATOR SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Ontario Power Authority's microFIT program and connected to the distributor's distribution system. Further servicing details are available in Tillsonburg Hydro's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Board, and amendments thereto as approved by the Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Board, and amendments thereto as approved by the Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges or assessments that are required by law to be charged by a distributor and that are not subject to Board approval, such as the Debt Retirement Charge, charges for Ministry of Energy and Infrastructure Conservation and Renewable Energy Program, the Provincial Benefit and any applicable taxes.
